

SANNI CHAUDHARI **(BACKEND DEVELOPER)**

Surat, Mandvi, Gujarat

chaudharisunny6@gmail.com | (+91) 8758384049 | github.com/chaudharisunny

Profile Summary

Node.js Backend Developer with hands-on experience building secure, scalable RESTful APIs and backend systems. Proficient in JWT authentication, third-party integrations (like Stripe), and MongoDB.

Technical Skills

- Languages: JavaScript (ES6+), TypeScript (learning)
- Backend: Node.js, Express.js, REST APIs, JWT, Stripe
- Database: MongoDB, Mongoose, PostgreSQL (basic)
- Tools & Platforms: Git, Postman, EJS, dotenv, Vercel (deployment)
- Other: Version Control, API Debugging, Error Handling, Basic Testing (Jest, Supertest)

Projects

Blog REST API

GitHub: https://github.com/chaudharisunny/Blog_RestApi

- Developed a blog API supporting CRUD operations for posts and comments.
- Secured endpoints using JWT-based authentication.
- Modeled and validated data with Mongoose and tested endpoints via Postman.

E-commerce Backend System

GitHub: <https://github.com/chaudharisunny/payment-gateway>

- Built shopping cart and order management system with secure payment integration using Stripe.
- Implemented JWT-based user authorization and dotenv for environment configuration.

Finance Tracker App

GitHub: <https://github.com/chaudharisunny/Finance-Tracking-System>

- Full-stack finance tracking app with Express.js and MongoDB.
- Features include category-wise expense tracking and monthly summaries.
- Secured user data using JWT and structured routes for modularity.

Education

Bachelor of Engineering – Information Technology

Government Engineering College, Gandhinagar — 2021
